B100: Dilution/Blocking Buffer

Product: B100: Dilution/Blocking Buffer

Description: Phosphate-buffered saline with 1.0% w/v bovine serum albumin, EDTA, and 0.02% W/V sodium azide. Designed for dilution of fluorescent antibodies to working dilution while stabilizing the antibodies for long storage life and providing optimal reduction of background, i.e. non-specific binding of the antibodies.

Preparation: Bovine serum albumin and EDTA are dissolved in phosphate-buffered saline. Sodium azide is added as preservative.

Lot/Quality Control Number: 188

Control/Production Date: 5/2024

Expiration Date: 11/2025

Stability & Storage: Store at 4° C.
